

This is how you make a Press-ready pdf for the Printer.

Indesign:

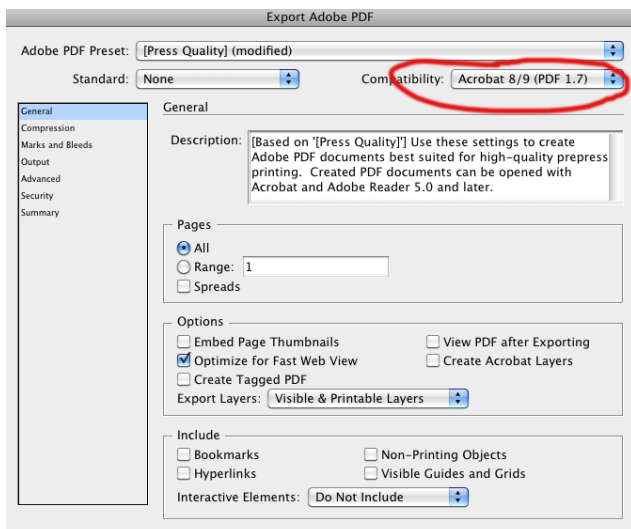

File ->>> Export

Select location for where you want your pdf to go.

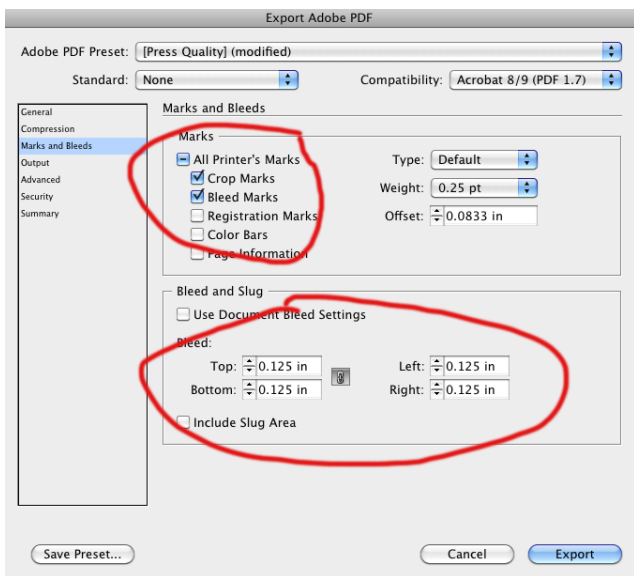

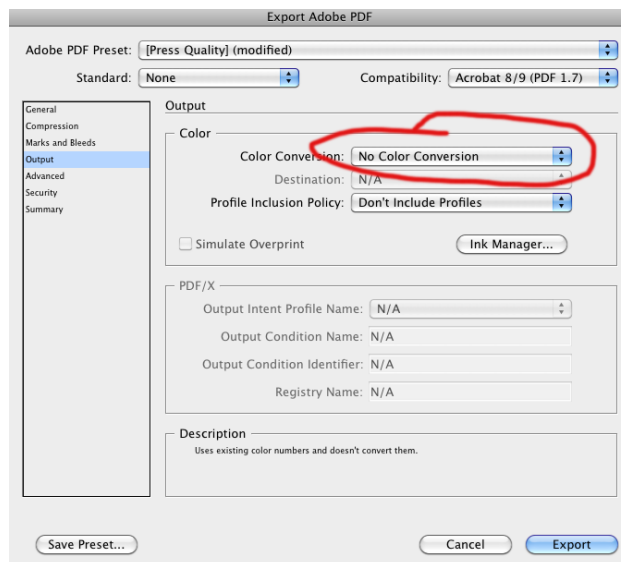

Select “Press Quality”

We will now customize the settings.

Follow the screen shots, other options leave as they are:

\*(Old screen shot, make it compatible with the latest version of Acrobat.)

Click on “Export”

You can also save and name your presets so you don't have to do this every time.
